FLOORING SYSTEMS

With the Onyx+ vinyl wall covering solution, exclusively designed for Forbo Flooring, we complete our wetroom offer. Onyx+ offers a smooth, hygienic wall surface in contemporary colours and stunning modern designs such as marble and travertine. It is perfectly suited for commercial wetroom applications in health facilities, as well as spas, pools, and changing rooms.

DESIGN

The Onyx+ wall product is designed with coordination in mind. The colours were developed to match with the colours of the Surestep safety flooring portfolio, but the collection also includes contemporary designs in both graphic and realistic executions. This product is the perfect way to elevate your wetroom with a touch of luxury. Mix and match with our various vinyl floor options, as both Onyx+ and our vinyl floors are designed to work seamlessly together for a complete wetroom solution. Designs were made with vertical installation in mind, most designs are also suitable for horizontal installation. Please consult sales support for horizontal installation of the Travertine design.

HYGIENE

Onyx+ is not only highly durable, but also incredibly low-maintenance. Its minimal joints create smooth surfaces that are effortless to clean. As a result, your walls will maintain a fresh and stylish appearance for years to come. Additionally, welding is easy thanks to the consistent base colour that runs throughout the colored backing.

SAFETY

Onyx+ is the ultimate choice for bathroom and shower materials, providing unparalleled safety and protection against moisture and water damage. With tiles, leaks can easily occur in the "invisible" layer. Onyx+ is a completely waterproof material when installed with welding rods. The material has the B-2s,d0 fire classification.
